There are in total about 55 (sub-) questions. About half of them can be answered with a short sentence or less. So you should spend less than 30 minutes for those 30 easy questions and then still have more than two minutes for each of the more difficult questions. The total number of points is 110, so you should spend about 1 minute per point.

1. Put your Email (without @shanghaitech.edu.cn) on top of every page. Fill out your name, student ID and Email on the front page. (worth one point!)
