

# Robotics 2016

## Project Report

(intermediate and final)

As a team, write a report for your project. It is written in LaTeX and in English, extending your proposal. It should have the following sections:

**Title:** Find a nice, catchy title for your project

**Subtitle:** "A project of the 2016 Robotics Course of the School of Information Science and Technology (SIST) of ShanghaiTech University \\  
`\url{https://robotics.shanghaitech.edu.cn/teaching/robotics2016}`"

**Authors:** Name all authors, including email addresses

**Abstract:** A short abstract/ summary what the project is about

**Introduction:** Very general description of your project. Motivation why such a project is interesting.

**State of the Art:** The same requirements as the proposal (you have a chance to improve on the state of the art section – make sure that you follow the requirements thoroughly – read the proposal requirements again!)

Additionally, present at least one more paper (in total, not per person) with at least 1/3 a page relevant to your problem.

**System Description:** Describe your idea and system & algorithm in detail. Also write which problems you overcame. Also add a subsection describing your ros packages and code in some detail (at least one page). Make sure you have an image of your hardware (if so) – identifying all the important parts.

**System Evaluation:** Describe how you want to test your system. Most likely you will make some experiments – describe them here. At least show some first results. Very important: Also come up with measures that you define "what is a successful system". For example: pick up in total 3 object within 10 minutes. Or: Drive "full speed" for 10 minutes along a square with some people traffic without crashing.

**Conclusions:** Short summary and conclusions

**Submission:** Your report has to be done in LaTeX. Your citations have to be collected into a separate .bib file! In your report repo create four folders: "intermediate", "final", "presentation" and "webpage".

Put your files in the according folder, make sure to submit the .tex file, the .bib file AND the .pdf file!

Important dates (see the webpage for the most current dates!!!). Submissions every 24h after the due date get 33% score deducted! Make sure not to commit in the according folder after the respective due date!

Dec 20<sup>th</sup>, 23:59: due date for the intermediate project report

Jan 20<sup>th</sup>, 23:59 due date for the final report.

Jan 20<sup>th</sup>, 23:59 due date for the webpage.
